

FROM THE ISPGHAN PRESIDENT

The current issue of PGLJ is unique in many ways. There is a new editorial board, a new format and increased content. This issue is also unique in that it will be the first to have hard copies for circulation to pediatricians. It will however continue to be available on our website, which also has many other academic material for your perusal. In particular, I invite your attention to the learning modules on common topics of interest for pediatricians.

I hope our continuing efforts at furthering the cause and awareness of pediatric gastroenterology in this country will be served by the journal. Your feedback will be of immense value for further improvement.

I congratulate the editorial board for their painstaking efforts and commitment.

Prof John Matthai
President

FROM THE ISPGHAN SECRETARY

Dear Friends and Colleagues.

COVID - 19 pandemic has caused us huge setbacks but it did not deter us from moving forward. We have successfully organised ISPGHAN-eCON 2020 as a virtual conference in IAP platform on 26th and 27th Sept 2020 which has attracted more than 2500 visitors. We have upgraded our official journal PGLJ both in looks and content. We require support from senior / junior colleagues in motivating post graduate students to submit quality scientific articles / interesting images to our journal.

Many thanks

Dr Naresh P Shanmugam
