

MESSAGE FROM EDITORIAL BOARD

As we are gearing up to welcome the new year, we feel glad to present to you the last issue of the APGH (Oct–Dec 2023) for this year.

We concluded the joint 10th annual meeting of the Indian Society of Pediatric Gastroenterology, Hepatology and Nutrition (ISPGHANCON 2023), the 33rd National Conference of Gastroenterology Chapter of IAP and 18th CAPGAN conference, hosted in the city of Hyderabad at Park Hyatt Hotel, Banjara Hills, from 26th– 29th October 2023 by Rainbow Hospital. The report on the conference along with some photographs will give you a glimpse of the four days of scientific feast. The award-winning abstracts are published in this issue which can pave the path for new research and inspire the younger generation.

Massive hepatomegaly has always attracted students, the examiner and the practicing hepatologist. This issue brings in a review of a very practical approach to massive hepatomegaly by Dr Arghya Samanta and Dr Moinak Sen Sarma.

The collation of important researches published in other journals is highlighted in the Journal Watch section.

Our own ISPGHAN members have been setting inspirational standards by publishing high-quality research in reputed journals which are summarized here.

Let us put on our thinking cap to solve Quiz 8 while we congratulate the winner of the Quiz 7.

The editorial board of APGH wishes all its readers a very happy new year and we promise to come to you every 3 months with renewed enthusiasm and stimulating articles.
